VERTICAL SURFACE FABRIC APPLICATION

Directional Application

All Trendway standard directional panel fabrics are applied down-roll on Capture Tiles, Choices Panels, Contrada Tiles, and all Systems Components.

COM Fabrics

COM fabrics may be applied either Down-roll (Fig. A) or Railroad (Fig. B). When choosing railroad on COM fabrics please note that 84" high Choices and TrendWall Panels cannot be railroaded, as panel fabric is 66" wide.

Downroll

The height dimension of the tile or component is parallel to the warp of the fabric (Fig. A).

Fig. A

Railroad

The height dimension of the tile or component is perpendicular to the warp of the fabric (Fig. B).

Fig. B

*   Multi-use fabric available on Capture, Fabric Screens, and Volo
•   Not available
R   Railroaded - The height dimension of the tile or component is perpendicular to the warp of the fabric
↓   Down Roll - The height dimension of the tile or component is parallel to the warp of the fabric
↔↕ Non-directional - Pattern will be applied for best yield
